# 1 TEST

## 1.1 inline verbatim

Here is a test inline verbatim (using `\texttt{}` in latex): `echo "hello word"`

## 1.2 indented verbatim block

Here is a test using indented verbatim block (`\begin{verbatim}...``\end{verbatim}` in latex)

```
sudo apt-get install dnsmasq
sudo service dnsmasq restart
```

## 1.3 quote block

Then a test using quote block<sup>1</sup> command

Thanks for your reply. John

Hello John, I am Steve from .... .. Sincerely, Steve

## 1.4 highlight code

And then using the highlight code

```
# specified interfaces
interface=eth0
# Dhcp range
dhcp-range=192.168.7.2,192.168.7.15,12h
# Enable dnsmasq's built-in TFTP server
enable-tftp
# Set the root directory for files available via FTP.
tftp-root=/var/tftpboot
```

---

<sup>1</sup>quote block doesn't work with different line as it should do. Is it normal?
